

PLOTTER SUMMA

Plotter template cutting sandblasting.

Summa plotters belong to the high-end range of the market and have become the market leader in sales of cutting plotters for engraving masks. They include servomotors and quick, accurate transmission systems, and with their traction system you can work with thick sandblast-type masks. The cutting head is very accurate and transmits a maximum real pressure of 400g for accurate cutting to ensure easy peeling with very detailed images or small-sized lettering.
