

ATLAS CSH 24

| | ATLAS |
|-----------------|---------------|
| HEIGHT | 160 cm |
| DEPHT | 55 cm |
| WIDHT | 65 cm |
| WEIGHT | 45 kg. |
| CAPACITY | 24 l /30 kg |
| PRESURE MAX | 8 bar |
| CONSUME AIR MIN | 400 l |
| AIR REGULATOR | yes |
| SAND REGULATOR | yes |
| REMOTE CONTROL | yes |
| VACUUM SISTEM | yes |
| MOTOR TYPE | Single phase |
| MOTOR POWER | Ametec 1000 w |

The Atlas model is an autonomous engraver that recovers and reinserts abrasive using a suction system with brush. It can be used as a portable engraver in a marble workshop or as a portable machine for external engraving. The pressure tank features a single-phase suction head that can be disassembled and transported in any vehicle. The sandblaster includes a brush holder with double brush that improves support on the piece and increases airflow for better abrasive suction. It can also be disassembled and connected to the hopper of an engraving cabinet.

The control system uses a pedal or trigger that connects to pneumatic pistons to start the valves automatically for an instant, perfect and continuous
