

MASTER JUNIOR

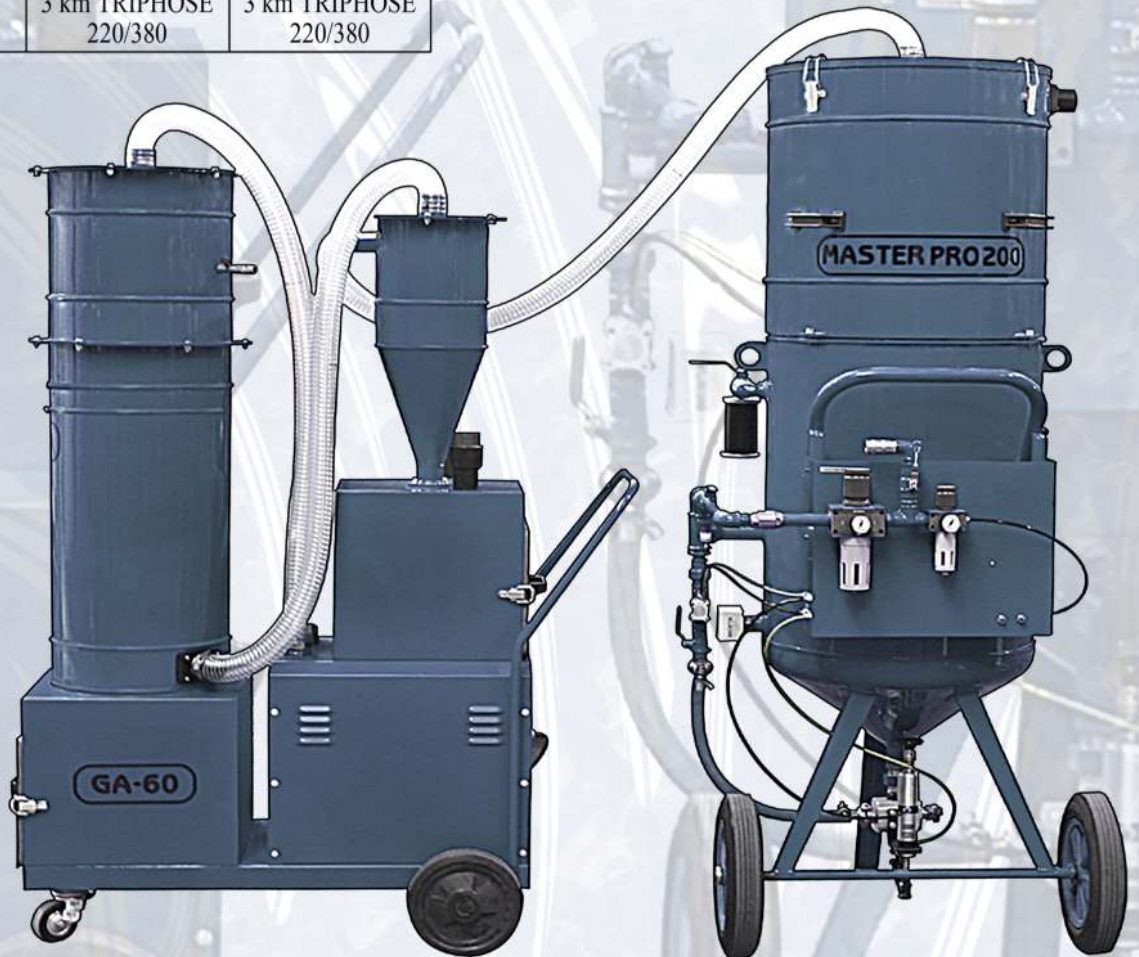

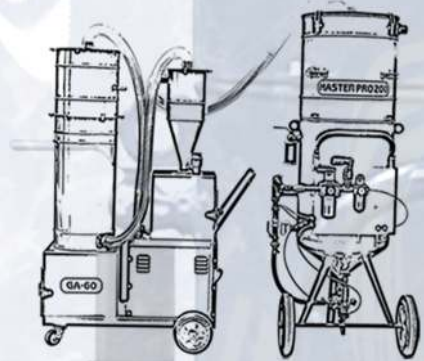

TANK	30 LITRES
MINIUM AIR FLOW	500 l/ MÍN
MAXIMUN PRESSURE	7 BAR
CYCLONE	YES
DUST FILTRE	AUTOCLEANING
FILTRATION FLOW	530 m ³ /h
MOTOR	3 MOTORS 1000w - 220V

Master engravers are the market's top-of-the-range models. Super tough and hardwearing, they are the machinery of choice when working with automatic sandblast cabins and tables, as they can operate continuously for hours at a time. They consist of a pressure tank and aspiration system (single-phase or three-phase) with independent dust and abrasive separation, which includes a high-efficiency cyclone (>95%) and a high-flow cartridge filter with a self-cleaning system using blasts of air. The automatic valve system ensures a perfect and continuous mix throughout the engraving process, producing high-quality work of great depth.
